

During Open Play Hours, Please Use The Paddle System To Fairly Rotate Players Into Games.

Step 1:

When you arrive to the court, place your paddle behind the paddles on the fence. If you are an advanced player, place the paddle on the “win” section. If you are a beginner player, place it on the “loss” section of the fence. If you are the first player to arrive on the court, place the paddle directly below the Win or Loss sign.

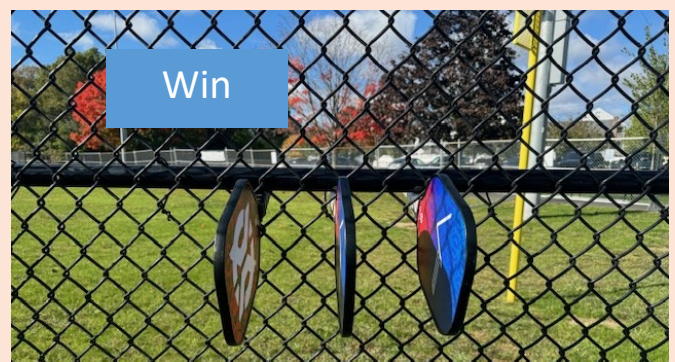

Place your paddle here

Step 2:

After a game ends, the first four paddles in the group gets to play.

Players will alternate between the “Win” and “Loss” section for the next group that plays.

First 4 paddles play next

Step 3:

When you finish a game, place your paddle in the back of the line. Winners of the game should place their paddle in the win section. Losers will place their paddle in the loss section. After a few rounds, this will help with keeping games evenly matched.
